

# Articles

**Author :** Andras Tantos

As time permits, I plan on publishing a set of articles on various topics. These pages will not talk about specific projects, I've worked on, though the experiences are mostly coming from those projects. Here my plan is to explore the theory behind those projects and provide detailed background information and practical design help.

So far, I have topics covering:

- [H-Bridges](#)
- [Electro-mechanical systems](#)
- [The Cray Files](#)
